Sound with a Conscience

thinksound™ began with a simple goal; to create incredible sounding headphones with the smallest eco-footprint possible. Our headphones are made with real wood, creating a more natural resonance and unparalleled acoustics.

We take our environmental impact as serious as we do our audio products. Our packaging is crafted from recycled materials, with minimal plastic components. We also use PVC-free cables and choose our wood from renewable sources. The result is great sound that you can feel good about.
